Education

Bachelor of Technology (Artificial Intelligence) , Mahindra University	Aug 2023 – Present
CGPA: — 7.0/10 (till 5 th semester)	
International Baccalaureate Diploma , DRS International School	June 2021 – May 2023
Percentage- 30/45	
CBSE , Sri Swaminarayan Gurukul International School	June 2019 – May 2021
Percentage- 84.3%	

Projects

Sepsis Prediction Simulator (Deep Learning | CNN–LSTM) 2025
Academic / Industry Integrated Project
Built a hybrid CNN–LSTM model for clinical time-series prediction. Applied sliding windows, normalization, threshold tuning, and probabilistic risk scoring. Integrated the trained model into a web-based real-time inference system.

AirTime – The Personal Pollution Budget (ML System) 2025
Self / Research Project
Built a data-driven system combining satellite data, sensor readings, and weather forecasts. Applied temporal aggregation and risk estimation for personalized pollution exposure. Designed predictive alerts for safer outdoor activity scheduling.

Resume–Job Description Semantic Matcher (NLP) 2025
Self Project
Implemented SBERT Bi-Encoder and MiniLM Cross-Encoder for semantic similarity scoring. Designed weighted ensemble scoring to simulate ATS systems. Applied preprocessing, tokenization, batching, and evaluation pipelines.

2D Platformer Game (Unity | C# | AI Logic) 2024
Self Project
Designed and developed a complete 2D platformer using Unity and C#. Implemented physics-based movement, collision handling, finite state machines, and rule-based enemy AI. Optimized performance and deployed final build publicly on Itch.io.

Predictive Maintenance System (ML | Python) 2024
Research Project
Built a machine learning model using CMAPSS sensor data to predict equipment failures. Combined KMeans clustering, Logistic Regression, and Random Forest to generate dynamic risk scores, enabling proactive maintenance scheduling and reducing unexpected downtime.

Stammering Prevention App (Android) 2022
Self-Project
Designed and developed an Android app to help users manage stammering through structured video lessons, personalized learning modules, and progress tracking. Features offline access, customizable learning paths, and interactive speech practice exercises.

ROSE Jewellery Website (Web Development)

2022

Freelance Project

Built an interactive jewellery showcase website featuring embedded video demos, a testimonial slider, Google Maps integration, and a contact form connected to Google Sheets. Designed with a responsive layout and social media integration for seamless user engagement.

Internship/Training Programs

ElectronWIZ Pvt. Ltd. — AI Engineer (Medical AI)

November 2025 – Present

ElectronWIZ Pvt. Ltd.

Working on deep learning-based medical risk prediction systems. Responsible for model experimentation, evaluation, and production integration.

CYK Solutions — Lead Developer & Documentation

June 2025 – November 2025

CYK Solutions

Contributed to technical development and structured documentation. Assisted in requirement analysis, product lifecycle planning, and deployment workflows.

GaMUverse - Game Developer and Game Designer

February 2025 – Present

Mahindra University

founding team of the Game Lab at Mahindra University, contributing to the establishment of a dedicated space for game design, development, and research. Involved in shaping the lab's direction, culture, and early projects at the intersection of technology and interactive media.

Maker's Lab - Research Assistant

January 2025 – Present

Mahindra University

CV with Quantum Computing (C++) Working on a research project exploring the application of quantum computing to computer vision tasks, implemented in C+.

Abhinaya Club - Technical Head

November 2025 – Present

Mahindra University

Leading all technical operations for Abhinaya, MU's official drama club, including lighting, sound, and AV coordination for live productions. Manage digital tools for promotions and content creation, while collaborating with directors and performers to translate creative concepts into polished stage executions.

Skills

Computational tools/skills: Python, C, Data Structures, OOP, Machine Learning, Deep Learning, PyTorch, NLP (Transformers, SBERT), Unity (2D/3D), C#, Node.js

Design software: Unity Engine, Figma (Basic), Cloud Firestore

Other Technical Skills: Web Development, Audio Design, Video Editing, Graphic Design

Awards and Achievements

- 1st Place – Ethical Hacking Hackathon (BITS Hyderabad)
- Completed Developes 35-hour Game Development Course
- Completed Generative AI Workshops (Outskill & IITH)
- Completed Quantum Computing Course (Qiskit Specialization)

Interests/Extra-curricular activities

Sports: Cricket and Badminton

Interests: Game Development, Artificial Intelligence, Emerging Technologies, Leadership

Social Service Initiatives:

- **Kalasatkriya** — Managed IT operations for a cultural fundraising event at Ravindra Bharathi, with proceeds donated to an orphanage.
- **Menstrual Health Awareness** — Participated in an educational campaign promoting menstrual health awareness among middle school students, including contributing to an awareness video.
- **E-Waste Management** — Designed awareness posters and conducted an on-site investigation at an e-waste disposal facility to promote responsible electronic waste practices.
- **Ethics Workshop** — Delivered a session on ethics and moral values to children of support staff at CapitaLand as part of a corporate social responsibility initiative.
- **Find A Bed (IIMUN Initiative)** — Coordinated the Telangana state effort for a COVID-19 relief project, helping patients locate available hospital beds during the pandemic crisis.
